BEST DE ADDICTION CENTER IN KERALA

One of the main challenges facing the new society is drug use. Today, including children who do not even have a child's knowledge, all forms of drugs are lying that undermine the chemical reactions in the nerves.Intoxicating substances in the form of candies from shops around the schools reach the hands of students through intoxicating agents. Having enjoyed the incomplete pleasure of the world of intoxicants, the minds of the students yearn to enjoy its full pleasure. Later, the students share the momentary experiences of intoxication. With this, what started as a student reaches the drug centers in groups of students looking for drugs.Intoxicated human minds like to live alone and away from society. Instead of the intoxicating agents that were sought in the early days of drug use, the intoxicated human minds are later sought after by deadly diseases like cancer.Intoxicated brains forget their family, self and work in their drunken journey of life and fall into debt and sacrifice their lives on any rope. With this the drunken life is over.

SOLUTION
